UltraTech surpasses 200 MTPA | A milestone to cherish

Dear Mr. Balakrishnan M S,

UltraTech has recently surpassed **200+ million tonnes per annum** of cement manufacturing capacity, making it the world's largest cement company by sales volume and capacity, excluding China.

This 200 MTPA milestone is one to cherish — not only because of what it says about UltraTech, but also because of what it says about India. It reflects the country's collective ambition towards *Viksit Bharat*. I wanted to share this moment with you personally, because this achievement did not happen in isolation.

I would like to acknowledge something truly important. At this scale, a company's strength is defined by the strength of its partnerships. Our success is built on the strength of valued partnerships such as yours, whose support enables us to honour every commitment we make. These trusted relationships have been fundamental to achieving the 200+ MTPA milestone, and I am confident they will continue to propel us forward. This milestone belongs as much to you as it does to us at UltraTech.

This achievement is another important step in our journey. India's ambition is only accelerating — and so is ours. I look forward to continuing this journey with partners like you, who have been with us at every step. Together, we now move onto a larger canvas in our collective endeavour towards nation building.

With appreciation and warm regards,

A handwritten signature in blue ink, appearing to read "K C Jhanwar".

K C Jhanwar

Managing Director,
UltraTech Cement Limited
